A Useless and Unnecessary Appeal.

Germany appears suddenly to have realized that the long forebearance and patience of the American government and people may not be interpreted as a license to submarine commanders to kill Americans on the high seas. Berlin evidently has long accepted our self-restraint as inviting defiance, has imagined that it was the purpose of the government at Washington to engage in a protracted diplomatic exchange and finally to drop, as an unpleasant incident the wanton wholesale murder of Americans. With the realization that the lapse of time has only increased our abhorence of the crimes and our determination to impose a penalty upon the perpetrators, in the absence of reparation and a guarantee for the future, Ambassador von Bernstorff yesterday sent a dispatch to the State Department asking that judgment be suspended in the case of the sinking of the Arabic until Germany's version of the crime is received.

The Ambassador need not have sent that dispatch. There is not a word in the communication to justify it. Long before word was received from the Ambassador, President Wilson had offered Germany the opportunity to explain, ancouncing that he would take no action until he ence; and his course cannot, and will not, be altered in any respect by Ambassador von Berns-

Quite obviously, however, it is the Ambassador's desire to substitute a new exchange of words for the action by this government, which he now knows is imminent; and he hopes to accomplish this by disputing the nationality of the two Amer- not yet dared to be silent together." ican victims of the torpedo which sank the Arabic.

"If Americans should actually have lost their lives, this would naturally be contrary to our intentions. The German government would deeply regret the fact and beg to tender sincerest sympathy to the American government."

We may expect from Germany therefore a denial that any Americans lost their lives when the only contention not already set up by apologists for the deed and swiftly met by rebuttal. While there will probably be no difficulty in indisputably establishing the American citizenship of two of the victims, it is not essential. A score or more Americans were on the Arabic and a deliberate attempt was made to murder them, de-lionship they find one of the greatest pleasures of spite Ambassador von Bernstorff's assertion that this would naturally be contrary to our intentions." The Value of Silence. By JOHN D. BARRY.

There are trying moments when, under stress of excitement, perhaps of resentment, we are tempted to use ill-considered words. If we have command of silence we may protect ourselves from irreparable harm. The least said being soonest mended, if nothing is said at all there

may be a complete avoidance of damage. But, of course, even silence may be abused. There are occasions when it may create ill-feeling. Even then, however, the forces behind it may be of help, warning us, if we must speak, to know what to avoid saying.

In controversy the silent people have a great dvantage. They know how confusing and irritating the talk is likely to be. They reply only to the essential, provided, of course, they have to reply at all. They develop a genius for avoiding the unessential, which includes the recriminating
